CLAIM AMENDMENTS

- 1. (Canceled)
- 2. (Previously Presented) The protective cover of claim 8 wherein at least one of the front and back panels includes an advertising display.
- 3. (Previously Presented) The protective cover of claim 8 further including a fastener for securing the cover to the guard rail.
- 4. (Original) The barrier cover of claim 2 wherein the advertising display is a message of stenciled letters.
- 5. (Original) The barrier cover of claim 2 wherein the advertising display is an electrical/electronic circuit comprising one or more lighting elements configured to display a message or image.
- 6. (Original) The barrier cover of claim 2 wherein the advertising display is one or more magnetically mounted objects of a ferro-magnetic material disposed on metallic surface.
- 7. (Previously Presented) The barrier cover of claim 2 wherein the advertising display is hookand-loop materials or a chalkboard surface.
- 8. (Currently Amended) A cover for a tubular metal guard rail of the type having two belowground ends and a substantially semi-circular above-ground midsection connecting the two ends, the
 ground cover comprising:

 a molded plastic article having rigid or semi-rigid spaced-apart opaque front and back panels

<u>a molded plastic article having rigid or semi-rigid spaced apart</u> opaque front and back panels <u>spaced apart by six inches or more</u>, each <u>panel</u> having a corresponding bottom edge, opposing side edges and a top edge;

TROY, MICHIGAN 48007-7021 (248) 647-6000 SUITE 330, P.O. BOX 7021 2701 TROY CENTER GROH, SPRINKLE, ANDERSON (248) 647-6000 TROY, MICHIGAN 48007-7021 GROH, SPRINKLE,

a <u>semi-circular</u> side panel connecting the sides and tops of the front and back panels, leaving a slot open at the bottom to receive the metal guard rail in slip-fit engagement such that the bottom edges are adjacent the ground surface; and

wherein the front and back panels smoothly transition through semi-circular the side panel without sharp edges corresponding to the tubular metal guard rail.

- 9. (Previously Presented) The cover of claim 8, wherein the side edges smoothly transition in the top edge to create arc-shaped front and back panels that correspond to the semi-circular mid-section of the guard rail.
 - 10. (Canceled)
- 11. (Currently Amended) A cover for a tubular metal guard rail of the type having two below-ground ends and a substantially semi-circular above-ground midsection connecting the two ends, the cover comprising:
- a molded plastic article having rigid or semi-rigid spaced-apart front and back panels spaced apart by six inches or more, each panel having opposing bottom edges, side edges, and semi-circular top edges corresponding to the semi-circular mid-section of the guard rail;
- a <u>semi-circular</u> side panel connecting the sides and tops of the front and back panels, leaving a solution open at the bottom to receive the metal guard rail in slip-fit engagement such that the bottom edges are adjacent the ground surface; and

wherein at least one of the front and back panels includes an advertising display.

- 12. (Previously Presented) The protective cover of claim 11, further including a fastener for generating securing the cover to the guard rail.
 - 13. (Canceled)
- 14. (Previously Presented) The protective cover of claim 11, wherein at least one of the front and back panels is opaque.

TROY, MICHIGAN 48007-7021 (248) 647-6000

- 15. (Previously Presented) The protective cover of claim 11, wherein the front and back panels smoothly transition through semi-circular side edges corresponding to the tubular metal guard rail.
- 16. (Previously Presented) A cover for a tubular metal guard rail of the type having an outer diameter, two below-ground ends, and a substantially semi-circular above-ground midsection connecting the two ends, the cover comprising:

spaced-apart, opaque, front and back panels, each having a flat bottom edge and a semi-circular upper portion; and

wherein the semi-circular upper portions of the front and back panels smoothly transition through an integrally formed semi-circular side edge corresponding to the outer diameter of the tubular metal guard rail, leaving a slot open at the bottom to receive the metal guard rail in slip-fit engagement such that the bottom edges are adjacent the ground surface.

- 17. (Previously Presented) The protective cover of claim 16, further including a fastener for securing the cover to the guard rail.
- 18. (Previously Presented) The protective cover of claim 16, wherein at least one of the front and
- 18. (Previously Presented) The protective cover of claim 16, wherein at less back panels includes an advertising display.

 19. (Previously Presented) A guard rail assembly, comprising:

 a tubular metal guard rail of the type having an outer diameter, two belows substantially semi-circular above-ground midsection connecting the two ends; a tubular metal guard rail of the type having an outer diameter, two below-ground ends, and a

a guard rail cover including two spaced-apart, opaque, front and back panels, each having a flat bottom edge and a semi-circular upper portion; and

wherein the semi-circular upper portions of the front and back panels smoothly transition through an integrally formed semi-circular side edge corresponding to the outer diameter of the tubular metal guard rail, leaving a slot open at the bottom to receive the metal guard rail in slip-fit engagement such that the bottom edges are adjacent the ground surface.
